

▲ WARNING

- * **Do not downshift when traveling at a speed that would force the engine to overrev in the next lower gear; the rear wheel may lose traction, resulting in a possible loss of vehicle control.**

CAUTION:

- * **Do not shift gears without disengaging the clutch and closing the throttle. The engine and drive train could be damaged by over-speed and shock.**
- * **Do not tow the motorcycle or coast for long distances while the engine is off. The transmission will not be properly lubricated and damage may result.**
- * **Do not ride over a curb or rub the wheel against an obstacle, as wheel damage may result.**

NOTE:

- * **The battery will not charge while the engine speed is near idle speed. Avoid idling for prolonged periods, or continuous operation below:**

1,500rpm

Keep the engine rpm below the tachometer red zone when accelerating in gear, overrevving can damage the engine.
