

### **Washing the motorcycle**

1. Rinse the motorcycle thoroughly with cool water to remove loose dirt.
2. Clean the motorcycle with a sponge or soft cloth using cool water.  
Avoid directing water to muffler outlets and electrical parts.
3. Clean the plastic parts using a cloth or sponge dampened with a solution of mild detergent and water. Rub the soiled area gently rinsing it frequently with fresh water.  
Take care to keep brake fluid or chemical solvents off the motorcycle.  
They will damage the plastic and painted surfaces.

The inside of the headlight lens may be clouded immediately after washing the motorcycle. Moisture condensation inside the headlight lens will disappear gradually by lighting the headlight in high beam. Run the engine while keeping the headlight on.

The taillight lens on your motorcycle is clear. The lens may become discolored if exhaust deposits or road contaminants accumulate on it. Exhaust deposits and road contaminants can be removed with a wet cloth and mild detergent.
