

STARTING THE ENGINE

Always follow the proper starting procedure described below.

This motorcycle can be started with the transmission in gear by pulling in the clutch lever before operating the kickstarter.

Your motorcycle's exhaust contains poisonous carbon monoxide gas. High levels of carbon monoxide can collect rapidly in enclosed areas such as a garage. Do not run the engine with the garage door closed. Even with the door open, run the engine only long enough to move your motorcycle out of the garage.

Do not use the electric starter for more than 5 seconds at a time. Release the starter button for approximately 10 seconds before pressing it again.

Preparation

Before starting, insert the key and turn the ignition switch ON.

Make sure that the transmission is in neutral. Turn the fuel valve ON.
