

Starting Procedure

1. Pull the choke lever (1) back all the way to Fully ON (A), if the engine is cold.
2. Press the starter button or operate the kickstarter to start the engine. Starting from the top of the stroke, kick through to the bottom with a rapid, continuous motion. Do not operate the throttle.
3. Warm up the engine until it runs smoothly, with the choke lever Fully OFF.

(1) Choke lever

Flooded Engine

If the engine fails to start after repeated attempts, it may be flooded with excess fuel. To clear a flooded engine, turn the engine stop switch OFF and push the choke lever forward to Fully OFF (B). Open the throttle fully and crank the engine several times. Wait 10 seconds, then turn the engine stop switch to RUN and follow the Starting Procedure.
