

Front Suspension Adjustments

8. Remove the front axle nut (10) and loosen the axle pinch bolts (11) on both forks. Pull the front axle shaft (12) out of the wheel hub and remove the front wheel with collars.

(10) front axle nut
(11) axle pinch bolts
(12) front axle shaft

9. Remove the brake hose clamp bolts (13), stay A (14) and stay B (15) from the left fork.
10. Remove the front brake caliper mounting bolts (16) and brake caliper (17) from the left fork.
- Do not support the brake caliper by the brake hose.
 - Do not operate the brake lever after the front wheel is removed. To do so will cause difficulty in fitting the brake disc between the brake pads.

Left fork:

(15) stay B
(16) front brake caliper mounting bolts
(17) brake caliper

11. Loosen the fork bridge lower pinch bolts (18), then pull the fork legs down and out.

(18) fork bridge lower pinch bolts

12. Clean the fork assembly, especially the sliding surface (19) of the slider and fork dust seal (20).
13. Measure the length (21) between the axle holder and outer tube and record it before disassembling the fork.
